SSC  
9.2

## Skills

---

- Java
- Spring and Spring Boot
- React
- MySQL
- C
- C++

## Projects

---

- Simple React Application**  
To view recent Movies and TV Shows
- MERN Stack Application**  
A simple app that keeps track of data that is stored in database

## Job Description

---

- Worked as Full Stack Developer during which my responsibilities included working in teams and Understanding Requirements.
- Creating RESTful Api's through which the data present in MySQL Databases can be modified through CRUD Operations.
- Adding Validations as per requirements and Avoid Run Time Exceptions.
- Work with Java Spring and Spring Boot Frameworks in creating MVC Architecture in projects.
- Working with ReactJs in creating User Interfaces (mainly Forms) through which user can interact with the database with Spring Boot Application as intermediate layer.
- Creating Forms and add Validations as per requirement.  
Using Context Api and Redux concepts to store state at global level and decide which type of states need to be stored at which level.
- Working with Axios and Fetch api's to consume Api's created.
- Generating Dynamic forms and Metadata that is used to create elements on UI side, by generating JSON data on server side as per requirement and use it effectively on Frontend side without always making requests to api.
- Fixing Bugs and adding Enhancements in Spring Boot, React and Angular projects.
- Making sure changes are made, code is committed and pushed within given deadlines and build and deploy the changes in different environments using Jenkins and testing those changes made through End to End Testing.

## Strengths

---

- Quick Learning and Dedication
